

# Flight Crew Licensing System

Welcome to SACAA's new system

As we all know that change is journey; walk with us through this transitional path as we strive to improve our client experience.

SACAA has implemented a new Flight Crew Licensing system and it is therefore required that the data be updated and outstanding data be captured. The license issuing process will take longer than usual. The process of licenses will take up to five working days for work in clients and seven working days for post, bulk and courier applications, provided all requirements are met.

We will continue communicating an improved turnaround time as and when the system matured.

Your understanding is much appreciated.
